

CONTRACTORS' "PERMIT TO WORK" SYSTEM

AIMS

To ensure that all persons entering Council/School Premises for the purposes of carrying out authorised scheduled work, or services, are under the control and supervision of The Manager thus reducing the potential accident situation and associated fire risks.

The protection of our employees whilst at work against risks to health and safety arising out of, or in connection with the activities of persons employed by external contractors, who are required to visit and carry out work or maintenance services on Council premises.

To enable the Manager to record and control the activities of contractors' working on their premises.

APPLICATION

When things go wrong our objective is to put them right as quickly as we can.

In an organisation of this size and complexity, technical faults and human errors do occur.

This inevitably leads to contractors' appearing on site, completing the work authorised by a Service Unit i.e. Architects, or in some instances the Diocese, and then leaving the premises without contacting The Manager.

It is therefore essential in the interests of health, safety and welfare to establish a control system whereby each technician or trades person entering the premises to carry out repair or maintenance work, reports and identifies the work activity.

In view of such circumstances it is required that the Manager introduces a "Permit to Work" system. The permit will be issued to contractors prior to any work commencing in or on the building,

PLEASE NOTE

<p>Contractors must provide written confirmation that they are in possession of suitable and adequate Public Liability insurance cover, including coverage of Hot Work operations.</p>
--

If you do not have this in place you may be violating your insurance policy. Please contact Risk Management or Health and Safety if you have any queries regarding your contractor's insurance cover.
